

2026

EEC 2026

11 - 13 May 2026

Milan

Italy

14th European Electric Arc Furnace Conference (EEC)
(together with EMECR 2026)

The European Electric Arc Furnace (EAF) Conference is an important event in the steel industry that focuses on the technologies, innovations, and developments surrounding electric arc furnaces. Electric arc furnaces are a key part of the steel production process, using electricity to melt scrap steel and produce new steel. The conference gathers professionals, industry leaders, and researchers from the steel and metallurgy sectors to discuss the latest trends, share know-ledge, and explore ways to improve energy efficiency, sustainability, and safety in EAF operations.

EMECR 2026

11 - 13 May 2026

Milan

Italy

5th International Conference on Energy and Material Efficiency and CO₂ Reduction in the Steel Industry (EMECR2026)
(together with EEC 2026)

<https://www.aimnet.it/eec2026/>

ESSC & DUPLEX 2026

Spain

12th European Stainless Steel Conference Science & Market and the 8th European Duplex Stainless Steel Conference & Exhibition

ESSC & DUPLEX will focus on all the aspects of development, production technology (hot and cold rolling, heat treatment, etc.), welding, corrosion and applications of stainless steels and duplex stainless steels and it addresses delegates with both academic and industrial backgrounds. The results shall contribute to the advancement of existing and potential applications and will help to guide future development. The event will bring together developers, designers, manufacturers and users of stainless steel from industry and academia and will compare the present and future needs to satisfy these demands now or in the future.

Short and medium term perspectives of European stainless steel flat, long products, forgings and castings will be widely discussed during the Stainless Steel Market Outlook session. It is expected the presence of speakers representing the most important European stainless steel associations and reports coming from the big stainless steel companies.

ICRF

13 – 15 October 2026

Bardolino – Verona

Italy

5th International Conference on Ingot Casting, Rolling and Forging (ICRF)

TMP 2026

20 – 22 October 2026 |

Vienna, Austria

7th International Conference on ThermoMechanical Processing of Steel (TMP)

ThermoMechanical Processing (TMP) is a well-established and strategic approach for enhancing and controlling the mechanical properties of

Conference Calendar

metallic materials. By combining deformation and heat treatment, TMP enables the optimization of microstructural features, allowing metals to meet the demanding requirements of modern mechanical and structural applications. The TMP 2026 Conference continues this tradition, while also addressing today's pressing challenges such as sustainability, digitalization, and the development of new material systems.

GALVATECH
11 – 15 October 2026
Monterrey
Mexico

14th International Conference on Zinc Alloy Coated Steel Sheet (GALVATECH)

The GALVATECH conference is the leading conference on cutting-edge technologies for the processing of coated steel sheets for the automotive, electrical appliance and construction industries. Topics: New Galvanizing Lines with Advanced Technical Concepts, PVD and Electroplated Coatings, Advances in HDG Process Technology, Challenges in Galvanizing Advanced High Strength Steels, Coated steel for Hot Press Forming, Recent Development in Structure and Surface Analysis, New Development and Applications of ZnMgAl Alloy Coatings, AI-Applications for Process Control, New Applications for Auto-mobile, Construction and Appliance, Hydrogen Embrittlement of AHSS, Post Treatment and Corrosion Behavior, Decarbonization of Galvanizing Lines

EMECCR 2026
10 – 12 November 2026
Nanchang
China

6th International Conference on Energy Material Efficiency and CO₂-Reduction in the Steel Industry (EMECCR)

The 6th International Conference on Energy Material and Energy Technology will be held from 10-12 November 2026 in Nanchang, China.

The provision of sufficient and reliable energy to meet the demands of rapidly developing technologies in society is a great challenge facing the world today. The development and application of new materials play a central role in almost most energy technologies, including efficient energy production, storage, conversion and utilization. This conference covers the topics of energy harvesting and conversion, storage technologies, and related energy material properties and applications, aiming to build an international platform for scholars, scientists, engineers and students to present and discuss the latest research results, and to stimulate more new ideas about energy materials and energy technologies.

India or UK

8th International Conference Small Sample Test Techniques (SSTT)

2027**ICSTI**

14 – 18 June 2027
Sapporo
Japan

The 11th International Congress on the Science and Technology of Ironmaking will be held from 14 to 18 June 2027, in Sapporo, Hokkaido, Japan. It will be organized by the Iron and Steel Institute of Japan (ISIJ).

In recent years, the global steel industry has been undergoing unprecedented transformation amid accelerating societal efforts toward carbon neutrality. ICSTI2027 aims to provide an international platform for academia, researchers, and engineers from around the world to showcase cutting-edge research, exchange innovative ideas, and discuss the future of ironmaking in a rapidly evolving landscape.

ESTAD

21 - 25 June 2027
Düsseldorf,
Germany

The European Steel Technology and Application Days – ESTAD will take place for the eighth time after Paris 2014, Düsseldorf 2015, Vienna 2017, Düsseldorf 2019, Stockholm 2021, Düsseldorf 2023 and Verona 2025. ESTAD was founded with the aim of creating a flagship conference bringing together steel manufacturers, suppliers, users, universities, research institutes and plant engineers and has become a leading conference for metallurgy and materials technology.

12th European Continuous Casting Conference (ECCC)

Conference Calendar**2028****ICS**
Brasil

The 10th International Congress on Science and Technology of Steelmaking (ICS) provides a forum for academic and industrial researchers to present their work on topics in process metallurgy, particularly those related to steel production, refining and casting. This meeting is aimed at creating an opportunity for a technical exchange at an international level among the numerous experts involved in steelmaking.
